John Healy

Software Engineer

SUMMARY

Experienced software engineer with a background in auto damage appraisals and a strong interest in automation. Skilled in analytical thinking, problem-solving, and effective communication. Passionate about technology and eager to apply my skills to web development. Excited to learn and collaborate with a development team to solve challenging problems.

WORK EXPERIENCE

Software Engineer at </JohnHealyCodes>

December 2022 — Present

- Assisted local clients with building responsive web applications and landing pages to grow their business and web presence. Consulted on SEO and social media strategy.
- Built semantically structured full-stack web applications and landing pages
- Applied agile methodologies like SCRUM for project management

Recent Projects:

Tattoo Artist Landing Page – A single-page landing page for a local tattoo artist. Utilizing mobile first design I created a single page where potential clients can see the artist's work and book a consultation.

Loss Adjustment Calculator – A web application that allows adjusters to create claim loss adjustment notes more efficiently.

Classify: DnD Class and Race Randomizer – A fun and new way to approach your group's next campaign! With the click of a button, your next character's race and class are selected randomly out of the DnD 5e database.

Other Projects: Bastrop StarGazers Society APOD Web App with NASA API integration, War a web-based card game, and many more

Estimating Tech Lead at Snapsheet

November 2016 — November 2020

March 2022 — Present

By utilizing my technical knowledge in auto damage appraisals and insurance claims handling I was able to influence and increase the productivity of my team, implement post-onboarding training and coaching to improve overall file quality, and I worked directly with our Product department to introduce a claim auto-assign feature to increase work output and reduce manual claim reassignment.

Outside Property Damage Adjuster | Austin, TX

January 2021 — March 2022

Used extensive policy knowledge and restoration construction knowledge to handle complex property damage claims ranging from hail/wind damage, interior weather-related water damages, and interior plumbing/sewage water losses by making decisions efficiently to bring the claims to completion.
